***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-27 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Bebbe et al. (USP 6,488,872) or McDevitt et al. (USP 6,589,779).

Bebbe et al. qualifies as prior art because the inventive entity is different than that of the instant application. Bebbe et al. teach a microfluidic device using a hydrogel containing a pH indicator to optically determine fluidic characteristics.

McDevitt et al. a microfluidic device with pH indicators bound to polymer beads. McDevitt et al. teaches in the paragraph identified as DETX(44) phenolphthalein indicator bound to polymer bead. Paragraph DETX(173-174) teaches a fluid transfer system and DETX(232) teaches placing the particles in grooves and electrophoretic systems.
